JF-MS1-512

512-CH Access Management Storage Server

Features

- ◆ Manage platform software professionally
- ◆ Stable operating system
- ◆ Powerful Centralized Management
- ◆ Multi-level server cluster, cascade
- ◆ Add user administrator and rights assignment
- ◆ Alarm management and video collaboration
- ◆ Testing equipment operating status
- ◆ Perfect log management
- ◆ Remote server configuration
- ◆ Memory self-starting function
- ◆ Density chassis design

Dimensions

JF-MS1-512

512-CH Access Management Storage Server

Specification

Model	MS1-512(Double network interface)
System Parameters	
Operating System	Embedded LINUX
Processor	High performance 64 bit multi-core processor
Built-in Disk	ST 500G SATA 2.5 inch Hard Disk
Function	
Video Management	512-channel management,64-channel forwarding(3M Bit Stream)
Management Function	Central management, front-end management, user rights management, registration management, storage management, stream media management, alarm management, etc.
External Interface	
Display Interface	VGA *1,　　DVI *1
USB Interface	USB2.0*6
Audio Interface	3
Network Interface	10/100/1000 Adaptive Network Interface*1
ps/2 Interface	2
Radiator	1U side-blown server special copper radiator
LED Indicator	Pre-position：power indicator light, built-in disk indicator; Postposition: network indicator light,
General	
Voltage Input	100V～240V，50Hz～60Hz
Power Supply	220W Server Single Power Supply
Working Temperature	Working:: 5℃～40℃　Storage：-20℃～70℃
Working Humidity	Working：20%～80%RH（No ice, no condensation） Storage：5%～95%RH（No ice, no condensation）
Dimension(mm)	1U standard,420(width)x430(depth)x45(height), support rack rail
Net Weight	8Kg
